

Project 1: Memez

Mix and match funny captions and hit meme images with the touch of a button.

View 1 of the home page when you first open the app.

View 1 of a randomly generated meme.

View 2 of randomly generated meme.

View 2 of home page; displays meme count at bottom.

Features:

- Randomly generates memez from 8 different captions and 8 different images
- Keeps track of how many memez user has generated
- Reset count of memez generated
- Available in English

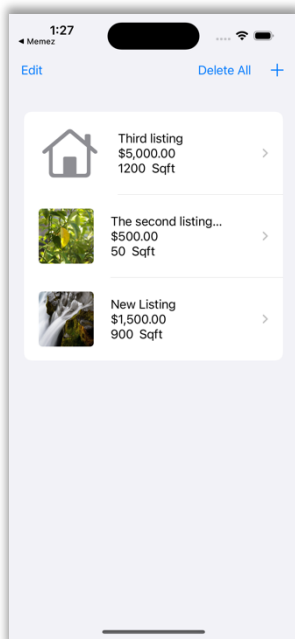

This app allows users to mix and match funny captions and hit meme images with the touch of a button. All captions are pop-culture references, and meme images are widely recognizable. The app keeps track of the amount of memez a user generates and allows them to reset the count with a simple touch on the home page. App includes 8 different captions and 8 different images for a wide variety of results.

Live, laugh, meme a little.

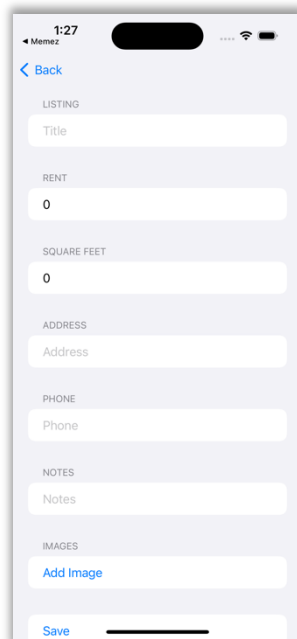

Project 2: New Digz

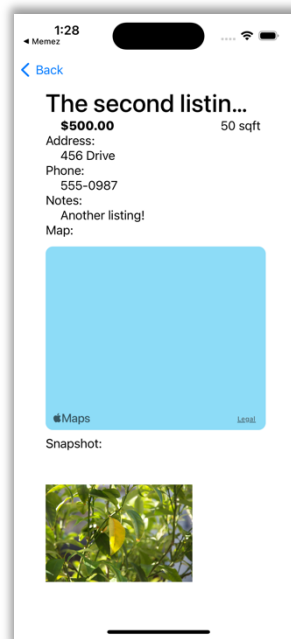

Save your home and apartment listings for easy access.

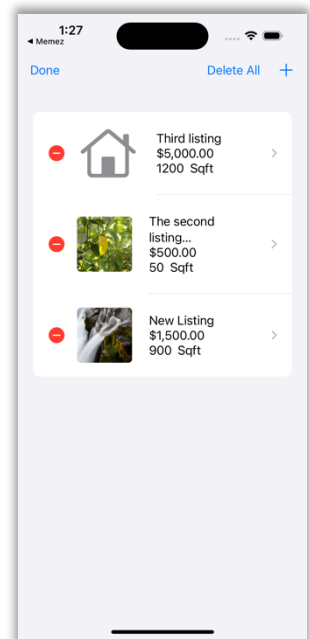

View 1 of the home page when you first open the app.

View of the form to add a listing.

View of a listing the user has added.

View 2 of home page; displays 'edit' feature.

Features:

- Add house or apartment listings and easily view them as a list on the home screen
- Listing entry feature includes map view and photos
- Easy access 'delete all' button for when user finds a house or apartment and no longer needs listings
- Available in English and Spanish

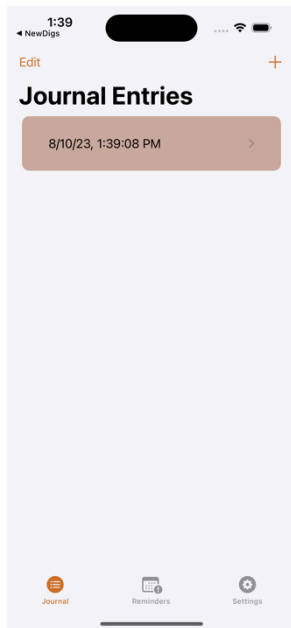

This app allows users to save their home and apartment listings for easy access. In the listing, users can include listing title, rent amount, square footage, address, phone number, notes, and photos. Once saved, the user can access the listings from the home page in a list view. List view gives users access to edit or delete all items from the list.

We make finding a new home easy!

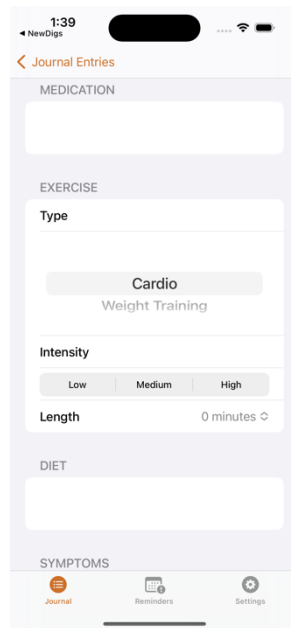

Project 3: Health Tracker

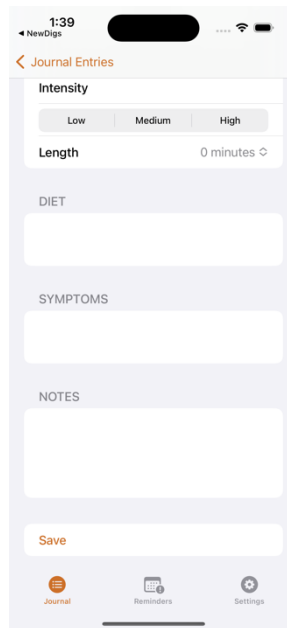

Track your health to better understand your body; set reminders to help keep you on track.

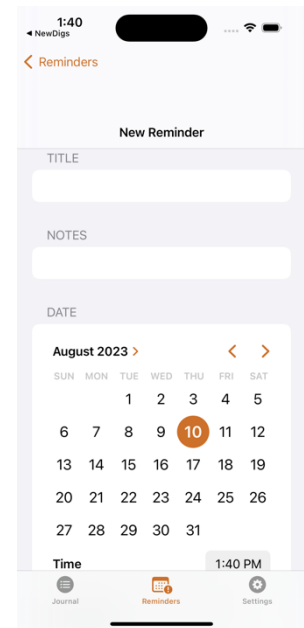

View of the home page when you first open the app.

View 1 of adding a journal entry.

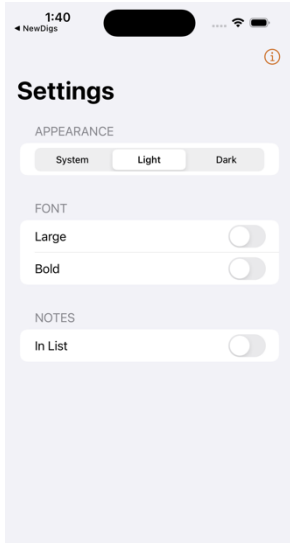

View 2 of adding a journal entry.

View of adding a reminder.

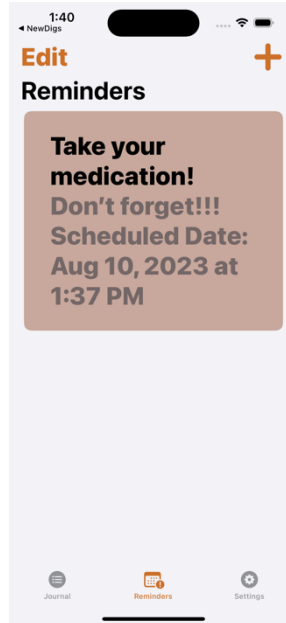

(continued on next page)

View of the settings page.

View of the information page.

View 1 of reminders list view; all settings on; light mode.

View 2 of reminders list view; all settings on; light mode.

Features:

- Add journal entries; includes sections for medication, exercise, diet, symptoms, and notes
- Set reminders with title, note, and date/time for reminder to notify user
- Control the following settings for appearance, text, and notes display
- Available in English and French

This app allows users to track their health in the form of journal entries. In these entries users can log medications they've taken; the type, intensity, and length of exercise; diets, symptoms, and any additional notes. Users will be able to view these entries by date on the home page, or access through the 'Journal' tab at the bottom of the screen. Users can also set reminders via the 'Reminders' tab at the bottom of the screen. App allows users to control certain settings for accessibility. Future app editions will include API integration for medication information to educate users on their prescriptions.

Track your health for a better life.
